WELCOME TO ETHIX MANAGEMENT

Live event production company Ethix Management undertake all types of events, from product launches to outdoor festivals, from corporate hospitality to project management.

Right from inception through to the final product Ethix act as specialists in the production, design, development and realisation of your specific event criteria.

The Ethix team can organise sound, lighting, video, venue facilities and a wealth of event services.

With many years experience in event production, Ethix management is an evolving business, offering a full event service to customers throughout the UK and worldwide.

Sound and lighting supply from Ethix Management offers its clients far more than just Sound and Lighting equipment, we offer a complete service: the Highest quality sound systems, experienced engineers, and exceptional sound reproduction in addition to providing intelligent lighting and control to ensure any event is delivered to an exceptional standard.

We can supply a custom system to suit every application, whether it be a stadium, festival or indoor event and have an extensive inventory of consoles, amplifiers, speakers, sound processing, moving lights dimmers, trussing and just about anything sound and lighting related.

Our equipment is never dry hired, which means all of our kit is used only by our professional engineers and is in pre-eminent condition. This

ensures you are not only getting the finest sound reproduction, and intelligent lighting but the equipment used is in pre eminent condition and ensures the possibility of failure is remote due to the careful maintenance and handling of all of our stock by our trained staff. We are constantly updating our stock inventory to keep up with the high demand for professional equipment.

EVENT PRODUCTION

Event production is the most challenging of its kind in the entertainment industry. The size, location and available resources make experience in event production an essential requirement.

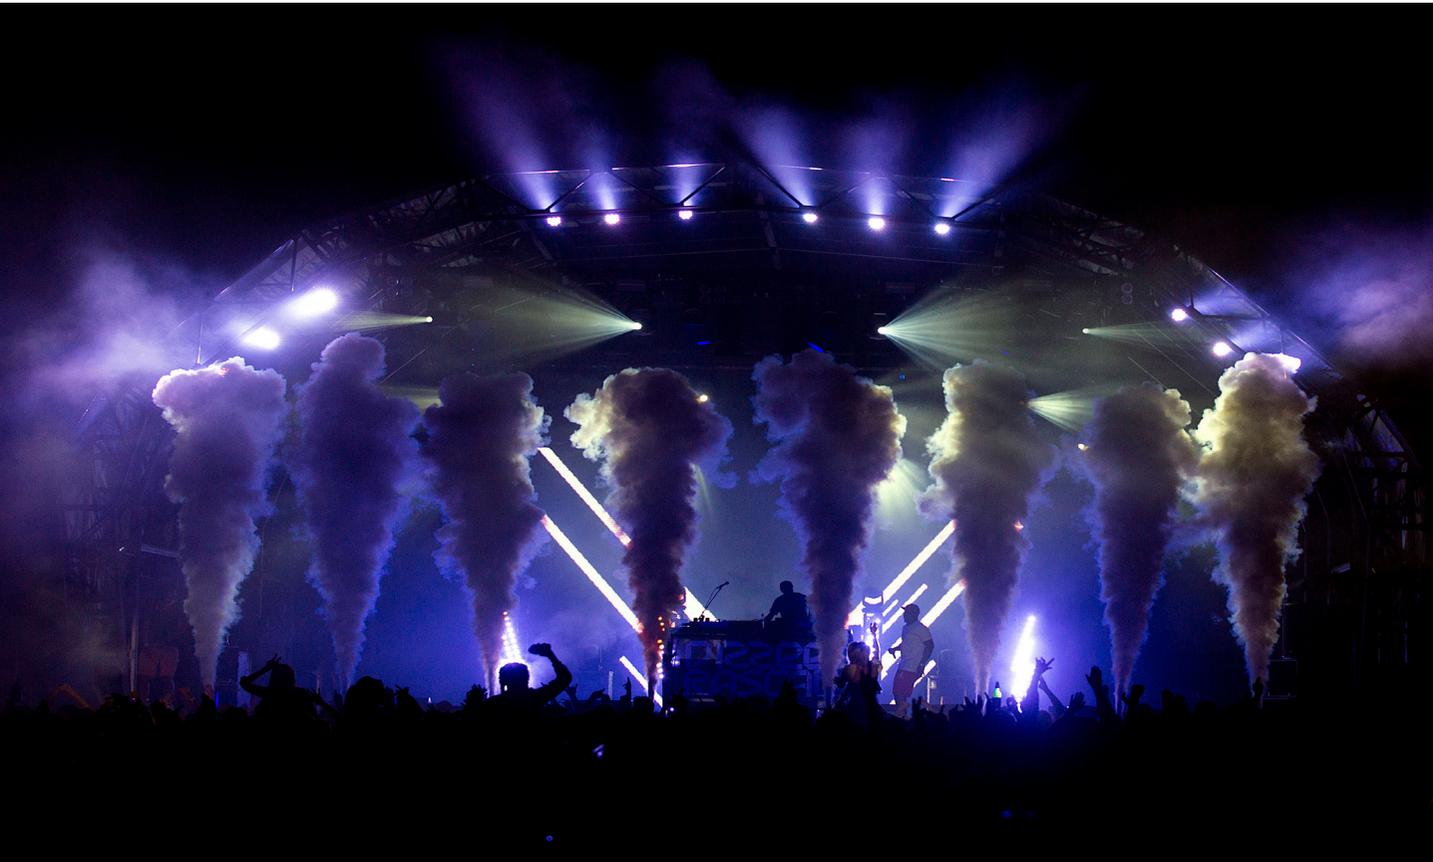

Ethix management can ensure the expectations of each individual client or organization are met, solve any problem and provide capable and integrated management across the whole project as required. The expert level of planning and technical

knowledge ensures deadlines are met and that the project stays within budget constraints. Our expert level of planning and technical knowledge ensures deadlines and any potential production conflicts can be dealt with before they arise.

Ethix Management has an expanding network throughout the world. We act for both private and public sector clients. A large professional team of fully experienced engineers and suitably qualified

individuals in the field of sound, lighting and full production management.

We can supply the minimal of equipment, or the management of all of your technical requirements. We can supply whatever you need to make your event run efficiently and smoothly. Many of our clients testimonials are available and we welcome the opportunity for new clients to explore our professional capabilities.

A large, diverse crowd of people is gathered at an outdoor event, likely a music festival or concert. The crowd is dense and extends far into the background. Many people are holding up their phones to take photos or videos. In the foreground, a man is holding a Union Jack flag. The scene is brightly lit, suggesting it's daytime. The overall atmosphere is one of excitement and celebration.

“Absolutely stunning service,
we promised some of the
younger musicians a World
class production and you
certainly delivered on that
promise!”

SEAN MCLOUGHLIN
SENIOR PRODUCER

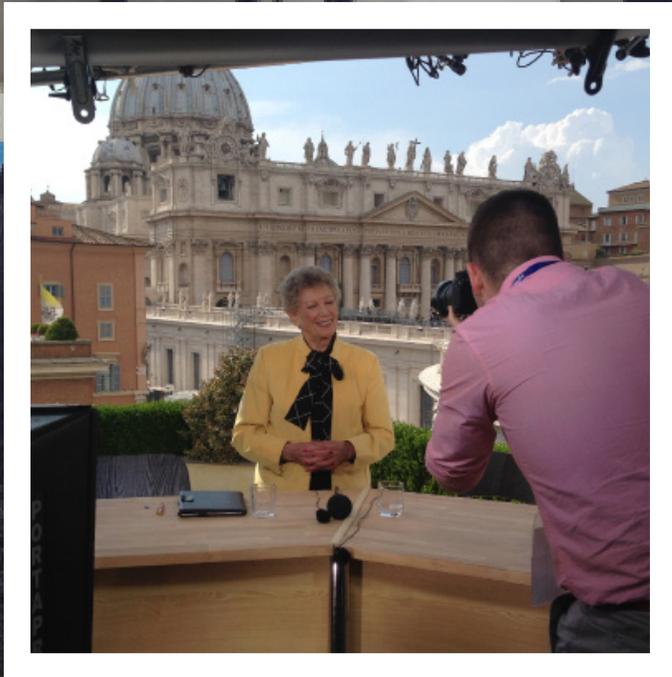

INSTALLATION

Ever increasing standards in event technology mean today's clientele have high expectations of audio and lighting systems.

Ethix Management can help you realise these expectations, be it in a Church, bar, club or live music venue we have the product knowledge and technical expertise to design, build and professionally install the ideal system for your event space.

Whether you need a full production delivering in West Africa or a TV studio built on a roof in Rome, Our team has the experience of delivering specific overseas projects. Ethix can manage and supply your event whatever the destination.

SPECIALIST EVENT SERVICES

POWER FOR YOUR EVENT

One of the fundamental requirements for an outdoor event is power, without power your event cannot happen. It is vital to use generated power that is reliable and fully maintained and installed to the new updated events industry regulation BS 7909:2008 and installed and commissioned to NICEIC specification when requested.

FULL PRODUCTION SERVICE

Ethix Management has been providing a full production service for various stages including mobile and orbit stages. We can offer very competitive packages for an unlimited amount of different events from outdoor festivals, Firework displays to a Christmas light switch on. Whatever your event needs we can provide an unsurpassed professional service.

Any outside event needs specialist planning to ensure a professional, successful but most importantly SAFE event. Ethix Management can help, from initial proposals for licence panels, risk assessment and emergency contingency planning through to production planning and event safety.
